Dear Prime Minister,

I am writing to ask you to make sustainable hospice funding a national priority and to receive the Every Hospice Matters petition at Downing Street.

We have a responsibility to fix the crisis facing palliative and end-of-life care. There are many funding pressures facing our local authorities and hospices, which are leaving communities without the care they desperately need. Community care is facing cuts, while too many people are spending their final days in hospital simply because the right care is not available at home. That cannot be considered a genuine choice at the end of life.

Hospice staff across Stockport and Greater Manchester show incredible dedication and compassion. Every day, they provide vital care and support for people from my constituency and communities across our region, helping patients and families navigate some of the most difficult moments in their lives. Their work is invaluable.

I urge you to meet some of the families behind the Every Hospice Matters petition and make sustainable hospice funding a national priority. This is a cross-party issue which affects so many of our constituents; we must ensure that every person can access compassionate, high-quality care when they need it most.

Yours sincerely
